

Tutorial:

1. Open the “named – mockup (.psd)” file that you downloaded.
2. After the photoshop interface appears, open the ‘Design’ folder.

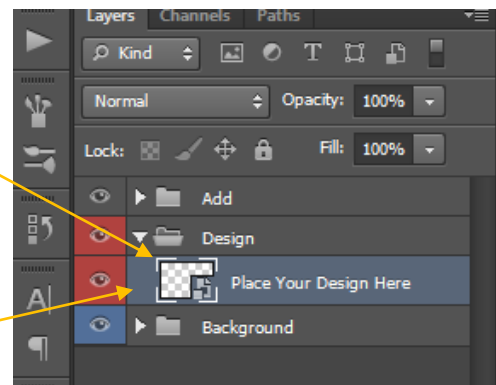

Click on Arrow

3. In the ‘Design’ folder there is a ‘Smart Object Layer’ which we named ‘Place Your Design Here’ or etc.

**the layer names in our mockup are not always the same. Layer naming depends on the mockup you are using.*

But to make it easier for you. We always give special names to the layers.

4. Double click on the 'smart object' layer. **it will automatically appear new artwork.*
5. Place your design at 'smart object layer artwork' with create a new layer and hide my default design.
6. After you creat or place your design. Save the ‘new artwork’ by pressing “CTRL” and “S” on the keyboard.
7. Check Folder ‘Background’. If you find the ‘color fill layer’ in the 'background' folder then you can change the background color.
8. Save as mockup image in JPG or PNG file format (PNG is recommended).
9. Send to clients your presentation.
